EXPERIENCE

B2XDev (Freelancer)

Flutter Developer

Jan 2021 - Present

- Collaborated with clients spanning diverse global regions, including France, the Philippines, Indonesia, India, USA, and Malaysia, to deliver customized software solutions.
- Provided comprehensive support for a minimum duration of 6 months post-project completion to ensure seamless functionality and client satisfaction.
- Proficiently navigated across multifaceted domains such as hospitality, social media, marketplace, and food industries.
- Engaged with startups to conceptualize and develop MVPs, which evolved into comprehensive projects, providing essential guidance and technical expertise throughout the process.

Bibloskart, Jaipur, Rajasthan, India

Android Developer

Oct 2019 - Jan 2021

- Orchestrated the development of the Bibloskart app, overseeing the creation of both delivery and admin applications, resulting in a remarkable 40% company growth upon launch.
- Played a key role in the intern recruitment process, conducting technical telephonic interviews to assess candidate suitability and skill levels.
- Implemented JavaScript cloud functions to streamline server-side operations, enabling automated notifications and enhancing system efficiency. This optimization contributed to a significant 30% increase in user engagement.
- Oversaw the development of a specialized seller application aimed at streamlining seller registration and product listing processes within the Bibloskart platform for optimal efficiency.
- Automated stock registration and management processes, reducing workforce requirements by 20%.

Inktop Publisher Ltd., Delhi, India

Android Developer Intern

May 2019 - Jul 2019

- Conceptualized and developed two internal applications pivotal to organizational operations.
- Supported the entire application lifecycle (concept, design, test, release and support).

Fiverr Seller (Freelancer)

Android Developer

Jan 2019 - Apr 2019

- Crafted custom applications for clients based in Sri Lanka and India, delivering tailored solutions that met their specific needs and preferences.
- Delivered two months of post-project support, promptly resolving bugs and ensuring smooth functionality.

PROJECTS

Bexpat | bexpat.co

Duration: 14 months

Technologies used: Flutter, Firebase, Javascript, Java, Figma.

- Connect with like-minded expatriates and travellers on Bexpat. Easily communicate, find jobs and accommodation, make friends, and explore new opportunities within your community.
- From conceptualization through MVP to full-scale implementation, spearheaded the development of Bexpat app that now boasts thousands of active users.
- Implemented an innovative algorithm that intelligently suggests tailored pages and profiles based on users' interests and locations, resulting in a notable 30% increase in user engagement.
- Engineered a streamlined chat system to enhance user communication while optimizing database usage, resulting in a notable 15% reduction in server costs.

ParrotPOS | parrotpos.com

Duration: 8 months

Technologies used: Flutter, MySql, Java, Adobe XD.

- ParrotPos is a unique platform designed to simplify bill payments, mobile prepaid top-ups, and donation processes while offering users the opportunity to earn cashback.
- Implemented a referral system to onboard new users, incentivizing successful referrals with rewards. This initiative contributed to a 25% increase in app downloads, demonstrating its effectiveness in driving user acquisition and growth.
- Developed a notification system to prompt timely bill payments, resulting in a 40% reduction in overdue charges, enhancing financial management.

GogoLean | gogolean.io

Duration: 7 months

Technologies used: Flutter, Firebase, Javascript, Java, Adobe XD.

- Gogolean is a SaaS comprehensive supply chain intelligence platform for Commercial Construction and Real Estate Management.
- Introduced an auction system for sellers, allowing buyers to bid on items with the highest bidder securing the purchase, resulting in a 20% increase in seller profits. This initiative effectively maximized revenue opportunities while enhancing user engagement.
- Designed a personalized searching algorithm that prioritizes the most relevant items based on user profiles. This innovation enhances user experience by delivering tailored search results and improving overall satisfaction.

LeanEquip | leanequip.com

Duration: 5 months

Technologies used: Flutter, Firebase, Javascript, Java, Adobe XD.

- A professional network for contractors and facility teams to manage heating and cooling equipment.
- Engineered cloud functions to automate the shipment process, resulting in a notable 35% reduction in delivery times. This optimization significantly improved operational efficiency and customer satisfaction.
